November 15, 2019

The Honorable John Carney and Members of the 150th General Assembly

Dear Governor and Members of the General Assembly:

The Board of Pension Trustees for the Delaware Public Employees' Retirement System (DPERS or the System) is proud to present its 48th Comprehensive Annual Financial Report for the Fiscal Year ended June 30, 2019.

This report provides information on nine plans [State Employees', Special Fund, New State Police, Judiciary, County & Municipal Police and Firefighters', County & Municipal Other Employees', Delaware Volunteer Firemen's Fund, Diamond State Port Corporation, and Closed State Police] plus three commingled investment funds [County & Municipal Police and Firefighters' COLA (COLA Fund), Post-Retirement Increase (PRI) and Delaware Local Government Retirement Investment Pool (DELRIP)]. Responsibility for both the accuracy of the data and the completeness and fairness of presentation rests with the State Board of Pension Trustees (Board). To the best of our knowledge and belief, the enclosed data are accurate in all material respects and present fairly the System's financial position and operational results for the Fiscal Year ended June 30, 2019.

The Fund's time-weighted return in Fiscal Year 2019 was 5.0% which was 2.3% below the policy benchmark of 7.0%. The Fund's 2019 return reflects a difficult comparison with last year's results, which included a large net appreciation of the System's Private Equity portfolio totaling \$202.0 million, recognized at the prior fiscal year-end. Excluding this adjustment, the Fund's return was 7.1%. In fiscal 2019, the Fund's 5.0% return compares with the 10.4% return of the S&P 500 stock index, the 1.3% return of the MSCI All-Country World ex-USA Index, the 7.8% return of the Bloomberg Barclays Capital U.S. Aggregate bond index, and the Delaware Benchmark of 7.0%.

The Honorable John Carney and Members of the 150th General Assembly Page 2 November 15, 2019

The System's longer-term results have been achieved with lower observed return volatility than the median for the universe, reflecting the System's longstanding focus on risk management. The Board, along with its Investment Committee and staff, will continue to actively monitor and proactively manage the System in a manner fully consistent with its fiduciary duty to the System's beneficiaries.

The Management's Discussion and Analysis (MD&A), located in the Financial Section of this report, provides a narrative introduction, overview, and analysis to accompany the basic financial statements. This Letter of Transmittal is designed to complement the MD&A and should be read in conjunction with it. The MD&A can be found immediately following the report of the independent auditors.

The System was established on June 11, 1970, with the incorporation of the State Employees', Judiciary, Closed State Police, and Retired & Disabled Teachers Pension Plans. The State Employees' and the Judiciary Plans were changed to actuarial reserve funding shortly thereafter. The Closed State Police Pension Plan remains a pay-as-you-go plan. Fiscal Year 1994 was the last year the Retired & Disabled Teachers' Pension Plan had members entitled to benefits.

When calendar year 1971 ended, the four pension plans totaled \$14.7 million in assets with 2,766 pensioners. The State's contribution was 13.1% of payroll. At the end of Fiscal Year 2019, monies from the nine plans and two pension commingled investment funds totaled \$10.3 billion. The State's contribution rate for the State Employees' Plan for Fiscal Year 2019 was 11.8% of payroll. Employer rates in the other plans that the Board administers range from 7.3% to 24.2% of covered payroll. Benefit coverage varies by plan as shown on pages 30-33. The majority of beneficiaries' pension benefits are well funded, with a majority of the System's total membership covered by plans with a funded ratio greater than or equal to 85.4%. The net pension liability of each plan is detailed on page 60.

Governmental Accounting Standards Board (GASB) Accounting

DPERS follows the provision of GASB Statement 67, which replaced those of Statement 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans, and Statement 50, Pension Disclosures. These provisions affect the financial reporting primarily through enhanced note disclosures and schedules of required supplemental information. These statements do not affect the funding requirements for the defined benefit plans, which continue to be calculated based on annual actuarial valuations in conformity with generally accepted actuarial principles and practices with the Actuarial Standards of Practice issued by the Actuarial Standards Board and applicable statutes.

DPERS provided information to participating employers on GASB Statement 68 for the year ended June 30, 2018. Statement 68 amends GASB Statement 27, Accounting for Pensions by State and Local Government Employers, by requiring the System to determine and allocate the net pension liability (asset), pension expense, and pension deferred outflows of resources and deferred inflows of resources attributable to each employer in the pension plans. The employers will report these amounts on their respective financial statements for the year ended June 30, 2019.

The Honorable John Carney and Members of the 150th General Assembly Page 3 November 15, 2019

Major Accomplishments

Best Practices – The Board, with the help of its legal counsel and various Committee members, continued its "Best Practices Review" during Fiscal Year 2019. Now in its fifteenth year, the process provides the benefit of annually comparing reviews of the System's operations and efficiency with similar public pension funds. Those reviews assist the System in identifying future initiatives. The Board promoted Trustee training opportunities including presentations by the founder of a highly successful private equity firm, the System's independent auditors, Chief Security Officer for the State's Department of Technology about cyber security and the investment advisor. Following recommendations from a best practice review conducted in a prior year by a third party consultant, the Board established an Internal Audit function during Fiscal Year 2018 and hired a director to oversee this function. In addition, with the help of outside legal counsel, the Board continued its review of the structure of the System and each of its nine plans as established in the Delaware Code for compliance with the Internal Revenue Code and its rules, regulations, and interpretive opinions. See the Tax Status update in Note 8 to the financial statements on page 50 for more details.

During Fiscal Year 2019, the Board engaged the actuarial firm of Gabriel, Roeder, Smith & Company ("GRS") to perform an independent actuarial audit of plans administered by the System. The purpose of the audit was to review actuarial methods and assumptions and replicate the plan valuations to verify computations of Actuarial Value of Assets, Actuarial Liabilities and Employer Contributions. In addition, the audit entailed a review of a certain number of test life cases to validate the programming and software used by the retained actuary to perform the plans' valuations. In GRS's opinion, the work of the retained actuaries fairly represents the position of the plans audited. Refer to page 107 in the Actuarial Section for the firm's actuarial audit letter to the Board.

GFOA Certificate of Achievement – The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to DPERS for its comprehensive annual financial report (CAFR) for the Fiscal Year ended June 30, 2018. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements. A Certificate of Achievement is valid for a period of one year only. This is the twenty-third consecutive year that DPERS has received a Certificate of Achievement. DPERS believes that its current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements, and we will submit the Fiscal Year 2019 CAFR to the GFOA to determine its eligibility for another certificate of achievement.

Public Pension Coordinating Council Award – The Public Pension Coordinating Council (PPCC) granted the System the Public Pension Standards Award for 2018. This is the sixteenth consecutive year the award has been received. The PPCC is a coalition of National Association of State Retirement Administrators (NASRA), National Council on Teacher Retirement (NCTR), and National Conference on Public Employee Retirement Systems (NCPERS). The major PPCC goal is to promote excellence in plan design and administration among state and local public retirement systems. The Public Pension Standards are intended to reflect minimum expectations for public retirement system management and administration and serve as a benchmark by which all defined benefit public plans should be measured. Public Pension Standards include: comprehensive benefit programs, funding adequacy, receipt of GFOA award in current year, independent actuarial valuation, independent audit review resulting in an unqualified opinion from the auditor, independent investment performance evaluation, adoption of written fiduciary standards by Board and Investment Committee, and communications with membership. The Honorable John Carney and Members of the 150th General Assembly Page 4 November 15, 2019

Investments and Economic Climate

The System's investment activity is governed by the "prudent person rule," a fiduciary standard which applies to anyone with System authority. Fiduciaries must discharge their duties solely in the interests of System participants and beneficiaries and with the degree of diligence, care and skill which prudent people would ordinarily exercise under similar circumstances.

The System continues to manage its investments by focusing on risk control and diversification. For a further discussion of portfolio diversification and investment strategy, see the Investment Section beginning on page 75 of this report.

The System's investments were positioned to benefit from market gains with an overweight exposure to public and private equities while underweight in fixed income, where holdings were more focused on credit. Equity allocation and manager changes during the year had the net impact of profit-taking in domestic equity, shifts to take advantage of relative value opportunities elsewhere in the world, and an increase in the Fund's liquidity position.

The Board's investment policy is summarized on pages 43-44. Investment objectives are outlined in the investment policy established by the Board, including the appropriate degree of risk. Investment managers are hired to execute the investment policy and have discretion for investment decisions within statutory authority, Board policy, and their respective guidelines. A list of the investment managers under contract with the System as of June 30, 2019, may be found on page 86 of this report. A summary of the total System's asset allocation can be found on page 85.

The System's investments had a 5.0% time-weighted return in Fiscal 2019. The System's annualized total returns for the last five, ten, and fifteen years are 5.8%, 9.6% and 7.6%, respectively. Relative to other large public pension funds, the System's performance ranks in the second quartile of the Trust Universe Comparison Service (TUCS) universe for the ten-year period ended June 30, 2019.

Funding Status

A pension plan is well funded when it has sufficient assets invested to meet all expected future obligations to participants. The greater the level of funding, the larger the ratio of assets to the net pension liability. Seven of the plans/funds included in the System – the State Employees', New State Police, Judiciary, County & Municipal Police & Firefighters' Plan, County & Municipal Other Employees' Plan, Closed Diamond State Port Corporation, and Special Fund – have funded ratios greater than or equal to 85.4% of the net pension liability. The Delaware Volunteer Firemen's plan is making annual contributions at the actuarially determined rate to reach full funding and the Closed State Police Pension Plan remains a pay-as-you-go plan.

The Honorable John Carney and Members of the 150th General Assembly Page 5 November 15, 2019

Internal Controls

System internal accounting controls are designed to reasonably assure the safekeeping of assets and the reliability of financial reporting. The concept of reasonable assurance recognizes that first, the cost of a control should not exceed the benefits likely to be derived and second, the valuation of costs and benefits requires estimates and judgments by management. Control procedures and responsibilities are well documented both in writing and with graphic flowcharts. These are reviewed and updated annually. The Audit Committee, a committee appointed by the Board, monitors operations and controls throughout the year. An independent auditing firm audits the System's basic financial statements annually and reports any findings to the Audit Committee and the Board.

Professional Services

The Board appoints professional consultants to perform ongoing services essential to the effective and efficient operation of the System. An opinion on the System's basic financial statements from the independent auditors, BDO USA, LLP, is included in the Financial Section of this report. The Northern Trust Company is the global custodian for the System. Cheiron, Inc. performs the actuarial valuations for the System and advises the Board on funding matters. The System's Investment Advisor, Windmark Investment Partners, provides the Board and the Investment Committee with periodic investment performance updates, ongoing market insights, asset allocation recommendations, investment manager research, manager recommendations, performance and attribution analysis, and additional investment-related services. TBV Advisors provides analysis of the System's operational and investment risk. Financial Recovery Technologies provides securities litigation monitoring to the System. The System has engaged several law firms to assist in specific areas: Ice Miller acts as tax counsel to the System and Chapman and Cutler LLP, Morgan, Lewis & Bockius LLP and Reinhart Boerner VanDeuren s.c. provide advice related to investment documentation and regulatory matters. KPMG US, LLP is the System's consultant in its Internal Audit function.

Acknowledgments

The Board thanks the many people who work so diligently to assure the successful operation and financial soundness of the Delaware Public Employees' Retirement System. These include the Pension Office staff; the Director of the Office of Management & Budget, who provides administrative supervision to the Pension Office; other State support personnel; professional consultants; members of the Governance Subcommittee, Investment and Audit Committees, Internal Auditors; and the Pension Advisory Council.

The System relies on many dedicated volunteers who bring their experience and expertise and often spend countless hours serving on committees as well as task forces for special projects. The Board expresses deep gratitude to Helen Foster, who stepped down from the Board during the fiscal year, for her many years of service. Her commitment and contributions to the System during her tenure are very much appreciated.

The Honorable John Carney and Members of the 150th General Assembly Page 6 November 15, 2019

Acknowledgments (continued)

The Board welcomes new member Harold Stafford to the Board. Harold is a retiree of the System; his last position was as the Delaware Secretary of Labor during Governor Ruth Ann Minner's tenure. He brings to the Board 31 years of state executive experience.

In addition, the Board expresses our deep gratitude to John McCartney, Information Systems Manager, who retired during fiscal year 2019. Mr. McCartney served in the Pension Office for twenty-nine years and made invaluable contributions to the System and its beneficiaries.

I am honored to work with a very fine Board and its Governance subcommittee, Investment and Audit Committees. We appreciate the ongoing support of both the Executive and Legislative branches of our state government, the Director of the Office of Management and Budget, the Executive Director and the Pension Office Staff, Deputy Attorney General, other state support personnel, our investment advisors and managers, professional consultants and the Pension Advisory Council. This remarkable team works tirelessly to produce one of the best managed pension funds in the country. Operationally we compare favorably or very favorably with other public funds across a host of measures. The System ranks in the second quartile for the ten-year period ended June 30, 2019, in investment performance for public funds in excess of \$5 billion in assets by the Trust Universe Comparison Service (TUCS). The System's longer-term results have been achieved with lower observed return volatility than the median for the universe, reflecting the System's longstanding focus on risk management. I look forward to continuing the longstanding working relationship with these various entities.

On behalf of our Board, I wish the State, the wider DPERS team and all of our beneficiaries only the very best going forward.

Respectfully submitted,

Sugarup Ghart

Highlights of Board Activities

The Board of Pension Trustees (Board) – comprised of five members appointed by the Governor and confirmed by the Senate, and two ex-officio members – is responsible for the general administration of these plans/funds:

- State Employees' Pension Plan
- Special Fund
- New State Police Pension Plan
- Judiciary Pension Plans (Closed and Revised)
- County & Municipal Police and Firefighters' Pension Plans
- County & Municipal Other Employees' Pension Plan
- Closed Diamond State Port Corporation Pension Plan
- Closed State Police Pension Plan
- Delaware Volunteer Firemen's Fund

The following retirement funds/plans have been established under the custody of the Board for investment purposes only:

- County & Municipal Police and Firefighters' COLA Fund
- Post-Retirement Increase Fund
- Delaware Local Government Retirement Investment Pool

In addition to its general administrative responsibilities, the Board is responsible for these specific functions:

- Maintain and oversee the investment of the Delaware Public Employees' Retirement System (System) and the Delaware OPEB Fund Trust (OPEB)
- Appoint an independent actuary to perform annual actuarial valuations used as the basis for contributions to the System
- Control and manage State pension payments
- Hear appeals from State Pension Office decisions regarding eligibility for pension benefits
- Adopt rules and regulations for the general administration of State pension plans
- Prepare and publish an annual report to the Governor and General Assembly
- To contract with State agencies and others for assistance in the general administration and the investing or advising as to the investment of pension system and OPEB assets
- Determine interest rates to be credited to members' contributions and rates to be charged on repayment of contributions previously withdrawn

The day-to-day administration of these plans/funds is performed by the State Pension Office, which also determines the eligibility of individual employees for pension benefits. The Pension Administrator reports to the Director of the Office of Management and Budget and also serves as Executive Secretary to the Board.

The seven-person Audit Committee of the Board monitors operations and internal controls throughout the year to identify issues requiring Board and Pension Office action. They are responsible for interfacing with the Delaware Auditor of Accounts and the independent auditing firm to assure System compliance with generally accepted accounting principles and practices.

Highlights of Board Activities (continued)

The Investment Committee of the Board is currently comprised of seven members. This Committee operates within the investment guidelines established by the Board. The Committee establishes policies to meet these objectives and monitors these policies with the assistance of the Investment Advisor. The Committee also reviews prospective risk levels and rates of return of all classes of assets. Hence, the Committee assures investment diversification by selecting managers who demonstrate different management styles and asset class expertise. Most importantly, the Committee closely monitors the performance of all investment managers, not only in relation to specific absolute objectives, but also in relation to other fund managers following the same investment objectives. Further discussion of the Investment Committee's activities may be found in the Investment Section of this report beginning on page 75.

The Board has approved the creation of a Governance subcommittee to oversee and advise the Board on the governance matters relating to DPERS administration, and consistent with the governance review undertaken of DPERS at the request of the Board. The Governance Subcommittee is comprised of five members, drawn from the Board and the other committees.

The Board retains Windmark Investment Partners as investment advisor for the System. Windmark provides a variety of services to the System including: investment manager and custody contract negotiations, investment manager searches, performance analysis/attribution, and investment policy and asset allocation recommendations. The firm is prohibited by contract terms from managing any of the System's assets. A list of investment managers under contract with the System as of June 30, 2019, may be found on page 86 of this report. In addition, the schedule of fees and commissions paid by the System is disclosed on pages 87-88.

The Board retains the firm of Cheiron, Inc., to provide professional actuarial and consulting services. Such services include the preparation of comprehensive actuarial valuations and reports, analysis of the costs and other aspects of proposed changes in pension provisions, general consulting advice, and background information on other public pension plans.

The Board also retains TBV Advisors, LLC, to provide risk assessment consulting services. TBV reports to the Board and its Committees the inherent and control risks in the System's operations and investments.

The Department of Justice assigns a Deputy Attorney General to serve as general counsel to the Board. The Deputy deals with legal questions involving interpretation and administration of pension laws, advises the Board in connection with appeals hearings, works with the Board on drafting legislation and regulations, and negotiates contracts.

The major activities of the Board and its committees during the 12-month period July 2018 through June 2019 were:

- As part of its continuing best practices review, continued to retain additional outside counsel to ensure full compliance with the IRS Code. Outside counsel was also retained for the purpose of drafting and reviewing alternative investment contracts. In addition, the Governance Subcommittee held regular meetings to continue addressing the recommendations entailed in the System's most recent review of best practices, that was performed by a third party consultant.
- Held regular monthly meetings and met with representatives of investment management firms and the custodial bank on a regular basis
- Held hearings for individual plan members who appealed decisions of the Pension Office, including eligibility of individual employees for disability pension benefits, or questioned the Board's interpretation of State pension laws
- Participated in meetings with the Governor's staff, members of the General Assembly, officials of State agencies and school districts, the Pension Advisory Council, representatives of employee organizations, and other interested parties.
- Retained an independent actuary to perform an actuarial audit of the plan valuations done by Cheiron, Inc.

Independent Auditor's Report

Board of Pension Trustees Delaware Public Employees' Retirement System Dover, Delaware

Report on the Financial Statements

We have audited the accompanying financial statements of Delaware Public Employees' Retirement System (the System), a component unit of the State of Delaware, as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the System's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the Delaware Public Employees' Retirement System as of June 30, 2019, and the changes in its fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Prior-Year Comparative Information: We have previously audited the System's 2018 financial statements, and we expressed an unmodified opinion on those financial statements in our report dated November 21, 2018. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2018 is consistent, in all material respects, with the audited financial statements from which it has been derived.

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms. BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Board of Pension Trustees Delaware Public Employees' Retirement System Dover, Delaware Page 2 of 2

Required Supplementary Information: Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 20 – 23 and Schedules 1, 2, 3, and 4, and the related notes to the required supplementary information on pages 51-65 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by Governmental Accounting Standards Board who considers it to be an essential part of the financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information or provide any assurance.

Supplementary and Other Information: The audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the System's basic financial statements. The Schedule of Administrative Expenses, Schedule of Investment Expenses, and the Schedules for Delaware Local Government Retirement Investment Pool (the Schedules) on pages 68-71 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. In our opinion, the Schedules are fairly stated in all material respects in relation to the basic financial statements as a whole.

The Introductory, Investment, Actuarial, and Statistical sections as listed in the table of contents have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 15, 2019 on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the System's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control over financial reporting and compliance.

BOO USA, LLP

November 15, 2019 Wilmington, Delaware

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms. BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Management's Discussion and Analysis

This section presents management's discussion and analysis of the Delaware Public Employees' Retirement System's (System) financial performance and provides an overview of the System's financial activities for the Fiscal Year ended June 30, 2019. It is intended to be a narrative supplement to the System's financial statements, which begin on page 24 of this report.

Financial Highlights

The following financial highlights occurred during the Fiscal Year ended June 30, 2019, versus Fiscal Year 2018:

- Plan net position of all the funds administered by the System increased by \$156.3 million.
- Fiscal Year 2019 covered payroll totaled \$2,284.4 million. Employer contributions increased by 20.0% while Member contributions increased by 8.0%. The increase in Member contributions is attributed to a higher amount of covered payroll.
- Net investment earnings (net increase/(decrease) in fair value, plus investment earnings, less investment-related expenses) of \$472.8 million was a result of a higher market driven investment return of 5.0% in Fiscal Year 2019.
- Transfer of Contributions from PRI Fund increased by 3.0% per planned schedule of transfers as disclosed in Note 2 of the financial statements.
- Pension benefits paid to retirees and beneficiaries increased by \$39.2 million bringing the total benefit payments to \$713.4 million.

Using this Financial Report

The System's 2019 Financial Statements, Notes to the Financial Statements and Required Supplementary Information (RSI) were prepared in conformity with GASB Statement No. 67, *Financial Reporting for Pension Plans—an amendment of GASB Statement No. 25*. This financial report consists of two basic financial statements as follows:

- The *Statement of Fiduciary Net Position* which reports the pension trust funds' assets, liabilities, and resulting net position where Assets Liabilities = Net Position held in trust for pension benefits available at the end of the fiscal year. It is a snapshot of the financial position of the pension trust funds at that specific point in time.
- The *Statement of Changes in Fiduciary Net Position* summarizes the pension trust funds' financial transactions that have occurred during the fiscal year where Additions Deductions = Net Change in Net Position. It supports the change that has occurred to the prior year's net position on the *Statement of Fiduciary Net Position*.

Because of the long-term nature of a defined benefit pension plan, the basic financial statements alone cannot provide sufficient information to properly reflect the System's ongoing plan perspective. The *Required Supplementary Information* includes four required schedules of historical trend information as follows:

The Schedule of Changes in Net Pension Liability (pages 51-59) presents sources of changes in the net pension liability.

The Schedule of Net Pension Liability (pages 60-61) includes historical information about the components of the net pension liability and related ratios, including fiduciary net position as a percentage of the total pension liability, and the net pension liability as a percentage of covered payroll.

The Schedule of Employer Contributions (pages 62-64) includes information about the actuarially determined contribution, contributions to the pension plan, and related ratios. Additionally, significant methods and assumptions used in calculating the actuarially determined contributions are presented in the notes to required supplementary information.

The Schedule of Investment Returns (page 64) includes the annual money-weighted rate of return on pension plan investments for each year.

Rates of Return on Investments

The System has elected to disclose both the money-weighted and time-weighted rates of return. The money-weighted rate of return is disclosed, by plan, in the notes to the financial statements (Note 7 – Deposits and Investments) and in the required supplementary information (Schedule of Investment Returns). The time-weighted rate of return is disclosed in the Introductory Section and Investment Section of this report.

A money-weighted rate of return provides information about the actual performance of a pension plan's investment portfolio because it takes into account the effects of transactions that increase the amount of pension plan investments (such as contributions) and those that decrease the amount of pension plan investments (such as benefit payments). Additionally, the money-weighted rate of return provides information that is comparable with the long-term expected rate of return on pension plan investments, which is used in calculating information presented in the financial section of this report.

In contrast, a time-weighted rate of return considers investment performance of a hypothetical dollar invested from the beginning of an investment period to the period's end. The time-weighted rate of return does not consider the effect of varying amounts invested due to, for example, the receipt of contributions or the payment of benefits. A time-weighted rate of return communicates information that is suitable for comparisons to relevant benchmark rates, provides information to assess investment manager performance, and provides comparability among pension plans and investment managers.

Analysis of Fiduciary Net Position

The System was created to provide retirement, survivor, and disability benefits to qualified members and their beneficiaries. The cost of such programs includes recurring benefit payments as designated by the various plans, refunds of member contributions to terminated employees, and the cost of administering the System. Combined Fiduciary net position increased by \$156.3 million during Fiscal Year 2019. The year's investment return of 5% or \$472.8 million in investment gains, employer contributions of \$326.2 million, employee contribution of \$82.3 million and benefit payments and administration expenses of \$719.9 million are the primary reasons for this year's increase in total plan net position.

On a year-to-year basis, plans had decreases/increases in required actuarial determined contribution rates that ranged from -1% to 46% with the largest rate increase being in the County Municipal Police and Firefighters' Plan ("CMPF"). Employer contributions' increase of \$54.7 million or 20% is primarily attributed to the State Employees' Plan, New State Police Plan and CMPF. These were partially offset by significant decreases in amounts contributed by the Diamond State Port Plan (Frozen as of October 2018). In addition, \$10.8 million of the overall increase pertains to general funds received from State of Delaware to pay for a one-time supplement benefit in accordance with previously enacted law: Section 10 of Senate Bill 236. Member contributions increased by \$5.8 million primarily as a result of increased covered payroll of active members. Transfers from the Post-Retirement Increase Fund decreased by \$0.4 million, which is in accordance with planned schedule of transfers for previously granted increases in retiree benefits.

Pension benefit payments increased by approximately 6% as a result of a net increase of 962 members/beneficiaries during Fiscal Year 2019 and due to the payment of the supplement benefit described above. Transfers of Assets Outside the System include transfers from the County & Municipal Police and Firefighters' COLA Fund (COLA Fund) to individual participating entities. This fund invests non-pension contributions designated for distribution to pension plans outside the System that meet certain program criteria.

Actuarial expenses increased due to the actuarial audit expenses incurred during Fiscal Year 2019. The System expects to incur this expense every few years as recommended by GFOA in their list of best practices for retirement systems. Equipment Hardware increased during the year due to the replacement of personal computers in the Pension Office. Miscellaneous Maintenance decreased, given the addition of new equipment described above.

Notes to Financial Statements June 30, 2019

1. Plan Descriptions and Contribution Information

The following plans/funds (the Plans) in the Delaware Public Employees' Retirement System (DPERS or System) are sponsored by the State of Delaware (the State) and are established in the Delaware Code:

- State Employees' Pension Plan
- Special Fund
- New State Police Pension Plan
- Judiciary Pension Plans (Closed and Revised)
- County & Municipal Police and Firefighters' Pension Plans
- County & Municipal Other Employees' Pension Plan
- Delaware Volunteer Firemen's Fund
- Closed Diamond State Port Corporation Plan
- Closed State Police Pension Plan

With the exception of the Closed Diamond State Port Corporation Pension Plan, the General Assembly is responsible for setting benefits and contributions and amending plan provisions; administrative rules and regulations are adopted and maintained by the Board. The Board of Directors for the Closed Diamond State Port Corporation is responsible for setting benefits and contributions and amending their plan provisions.

The management of all the Plans and Funds in the System is the responsibility of the Board of Pension Trustees (Board). The Board's oversight includes management of investment funds and pools included in the System, the Post-Retirement Increase Fund, the County & Municipal Police & Firefighters' COLA Fund, and the Delaware Local Government Retirement Investment Pool. These funds are commingled for investment purposes only. These funds are more fully explained in Note 2 to the financial statements.

The Board is comprised of five members appointed by the Governor and confirmed by the State Senate, plus two ex-officio members. The daily operation of the System is the responsibility of the Office of Pensions. Although most of the assets of the Plans and Funds are commingled for investment purposes, each Plan's or Fund's assets may be used only for the payment of benefits to the members of that Plan or Fund in accordance with the terms of that Plan or Fund. Although separate financial statements are presented for the System as a whole, the System is considered a component unit of the State of Delaware financial reporting entity and its financial statements are included as Pension Trust Funds within the Fiduciary Funds of the State's financial report.

A component unit is defined as a legally separate organization for which the elected officials of the primary government are financially accountable. The System is thus classified as a component unit of the State of Delaware because the State Senate retains certain significant governing powers over the System as described in the Board structure above. The System's financials are not intended to present the financial position and results of operations of the State.

The following employee membership data related to each Plan is based on an actuarial valuation as of June 30, 2018, updated as of June 30, 2019 using roll forward procedures in accordance with actuarial standards of practice:

Plan	Inactive Plan Members or Beneficiaries Currently Receiving Benefits	Inactive Plan Members Entitled to But Not Yet Receiving Benefits ⁽¹⁾	Active Plan Members	Total Plan Members	Participating Employers ⁽²⁾

Total Membership:	30,953	4,755	44,272	79,980	147

(1) Includes individuals on long-term disability.

(2) Participating employers are not unique; an employer can sponsor more than one plan.

The following are brief descriptions of the individual plans in effect as of June 30, 2019. For a more complete description, please refer to the respective plan documents.

State Employees' Pension Plan

Plan Description and Eligibility: The State Employees' Pension Plan is a cost-sharing multiple employer defined benefit plan that covers virtually all full-time or regular part-time employees of the State, including employees of other affiliated entities.

There are two tiers within this plan: 1) employees hired prior to January 1, 2012 (Pre-2012). 2) employees hired on or after January 1, 2012 (Post-2011).

Service Benefits: Final average monthly compensation (employee hired Post-2011 may not include overtime in pension compensation) multiplied by 2.0% and multiplied by years of credited service prior to January 1, 1997, plus final average monthly compensation multiplied by 1.85% and multiplied by years of credited service after December 31, 1996, subject to minimum limitations. For this plan, final average monthly compensation is the monthly average of the highest three periods of twelve consecutive months of compensation.

Vesting: Pre-2012 date of hire: 5 years of credited service. Post-2011 date of hire: 10 years of credited service (5 of which must be consecutive).

Retirement: Pre-2012 date of hire: Age 62 with 5 years of credited service; age 60 with 15 years of credited service; or after 30 years of credited service at any age. Post-2011 date of hire: age 65 with at least 10 years of credited service; Age 60 with 20 years of credited service; 30 years of credited service at any age.

Disability Benefits: Pre-2012 date of hire: Same as Service Benefits. Employee must have 5 years of credited service. In lieu of disability pension benefits, over 90% of the members of this plan opted into a Disability Insurance Program offered by the State effective January 1, 2006. Post-2011 date of hire – in the Disability Insurance Program. Survivor Benefits: If employee is receiving a pension, the eligible survivor receives 50% of pension (or 67.7% with 2% reduction of benefit, 75% with 3% reduction of benefit, or 100% with 6% reduction of benefit.); if employee is active with at least 5 years of credited service, eligible survivor receives 75% of the benefit the employee would have received at age 62. Amount payable to a surviving spouse under age 50 at the time the survivor's pension begins, shall be reduced for each month under age 50 in accordance with actuarial tables approved by the Board. Any actuarial reduction for such a spouse shall however not apply for the period during which the spouse has in his or her care, an unmarried child or children.

Contributions:

Employer - determined by Board of Pension Trustees. Employer contributions were 11.83% and 10.42% in Fiscal Years 2019 and 2018 respectively. *Member*-

Pre-2012 date of hire - 3% of earnings in excess of \$6,000. *Post-2011 date of hire* - 5% of earnings in excess of \$6,000. *Correctional Officers* - additional 2% of earnings in excess of \$6,000.

Burial Benefit: \$7,000 per member.

Special Fund

Plan Description and Eligibility: The Special Fund provides certain benefits granted to individuals identified through legislation passed by the General Assembly.

Service Benefits: Defined by special legislation.

Vesting: Defined by special legislation.

Retirement: Defined by special legislation.

Disability Benefits: Defined by special legislation.

Survivor Benefits: Same as State Employees' Plan.

Contributions: Employer contributions are actuarially determined and fully funded in advance by the General Assembly.

Burial Benefit: \$7,000 per member.

New State Police Pension Plan

- **Plan Description and Eligibility:** The New State Police Pension Plan is a single-employer defined benefit plan that covers all State police officers appointed on or after July 1, 1980.
- Service Benefits: 2.5% of final average monthly compensation multiplied by years of credited service up to 20 years, plus 3.5% of final average monthly compensation multiplied by years of service in excess of 20 years. For this plan, final average monthly compensation is the monthly average of the highest three consecutive years of compensation.

Vesting: 10 years of credited service at age 62.

Retirement: Age plus credited service (but not less than 10 years) equals 75; has 10 years of service and is retired due to age 55; or 20 years of credited service.

Disability Benefits:

Duty - Total Disability - 75% of final average monthly compensation plus 10% for each dependent not to exceed 25% for all dependents.

Duty - Partial Disability - calculated the same as Service Benefits, subject to minimum 50% of final average monthly compensation.

Non-Duty - Same as Service Benefits, total disability subject to a minimum 50% of final average monthly compensation plus 5% for each dependent not to exceed 20% for all dependents. Partial disability to a minimum of 30% of final average monthly compensation.

Survivor Benefits: If employee is receiving a pension, the eligible survivor receives a minimum of 50% of pension; if employee is active, eligible survivor receives 50% of pension. If member is killed in the line of duty, eligible survivor receives 75% of member's compensation.

Contributions:

Employer - determined by Board of Pension Trustees. Employer contributions were 24.23% and 21.17% of earnings for the Fiscal Year 2019 and 2018 respectively. *Member* - 7% of compensation.

```
Burial Benefit: $7,000 per member.
```

Judiciary Pension Plans (Closed and Revised)

Plan Description and Eligibility: The Closed

Judiciary Pension Plan is a single-employer defined benefit plan that covers members of State Judiciary appointed before July 1, 1980.

The Revised Judiciary Pension Plan is a singleemployer defined benefit plan that covers members of State Judiciary appointed on or after July 1, 1980 or members appointed before July 1, 1980 who accept the provisions of this Plan.

Assets of one plan can be used to satisfy the liabilities of the other plan.

Service Benefits:

Revised - 1/24th of final average monthly compensation multiplied by years of service up to 12 years, plus 1/48th of final average monthly compensation, multiplied by years of service from 13 to 24 years, subject to maximum limitations.

For this plan, final average monthly compensation is the monthly average of the highest three consecutive years of compensation.

Vesting: 12 years of credited service.

Retirement:

Revised - Age 62 with 12 years of credited service, or any age with 24 years of credited service.

Disability Benefits: Same as Service Benefits.

Survivor Benefits:

Closed - If employee is receiving a pension, then eligible survivor receives 2/3 of pension; if employee is active with 12 years of credited service, then eligible survivor receives 2/3 of pension the employee would have been eligible to receive.

Revised - If employee is receiving a pension, the eligible survivor receives a minimum of 50% of pension (or 2/3 with 2% reduction of pensioner's benefit); if employee is active, eligible survivor receives 2/3 of the benefit the employee would have received at age 62.

Contributions:

Employer - determined by Board of Pension Trustees. Employer contributions were 20.62% and 19.87% of earnings for the Fiscal Year 2019 and 2018, respectively.

Member - Closed - \$500 per year for the first 25 years of service.

Member - Revised - 3% of earnings that exceed \$6,000 per year, plus 2% of earnings that exceed the Social Security Wage Base for the first 24 years of service.

Burial Benefit: Not applicable.

County & Municipal Police and Firefighters' Pension Plan

Plan Description and Eligibility: County & Municipal Police and Firefighters' Pension Plan, is a cost-sharing multiple-employer defined benefit plan that covers police officers and firefighters employed by a county or municipality of the State which has become part of the Plan.

Service Benefits: 2.5% of final average monthly compensation multiplied by years of credited service up to 20 years, plus 3.5% of final average monthly compensation multiplied by years of service in excess of 20 years. For this plan, final average monthly compensation is the monthly average of the highest three consecutive years of compensation (excluding overtime and special pay).

Vesting: 5 years of credited service.

Retirement: Age 62 with 5 years of service; age plus credited service (but not less than 10 years) equals 75; or 20 years of credited service.

Disability Benefits:

Duty - Total Disability - 75% of final average monthly compensation plus 10% for each dependent not to exceed 25% for all dependents.

Duty - Partial Disability - calculated the same as Service Benefits, subject to minimum 50% of final average monthly compensation.

Non-Duty - Same as Service Benefits, total disability subject to a minimum 50% of final average monthly compensation plus 5% for

each dependant not to exceed 20% for all dependants. Partial disability to a minimum of 30% of final average monthly compensation.

Survivor Benefits: If employee is receiving a pension, then eligible survivor receives a minimum of 50% of pension; if employee is active, eligible survivor receives 75% of pension the employee would have received at age 62. If the member is killed in the line of duty, the eligible survivor receives 75% of the member's compensation.

Contributions:

Employer - determined by Board of Pension Trustees. Employer contributions were 16.68% and 11.42% of earnings for the Fiscal Year 2019 and 2018, respectively. *Member* - 7% of compensation.

Burial Benefit: Not applicable.

County & Municipal Other Employees' Pension Plan

- **Plan Description and Eligibility:** County & Municipal Other Employees' Pension Plan is a cost-sharing multiple-employer defined benefit plan that covers employees of counties or municipalities which have become part of the Plan.
- **Service Benefits:** 1/60th of final average monthly compensation multiplied by years of credited service, subject to maximum limitations. For this plan, final average monthly compensation is the monthly average of the highest five years of compensation.

Vesting: 5 years of credited service.

- **Retirement:** Age 62 with 5 years of credited service; age 60 with 15 years of credited service; or after 30 years of credited service.
- **Disability Benefits:** Same as Service Benefits. Employee must have 5 years of credited service.
- **Survivor Benefits:** If employee is receiving a pension, then eligible survivor receives a minimum of 50% of pension; if employee is active, eligible survivor receives 50% of pension the employee would have received at age 62.

Contributions:

Employer - determined by Board of Pension Trustees. Employer contributions were 7.3% and 7.1% of earnings for the Fiscal Year 2019 and 2018, respectively.

Member - 3% of earnings in excess of \$6,000.

Burial Benefit: Not applicable.

Delaware Volunteer Firemen's Fund

Plan Description and Eligibility: The Delaware Volunteer Firemen's Fund is a cost-sharing multiple-employer defined benefit pension plan that covers all actively participating volunteers of fire departments, ladies auxiliaries, or ambulance organizations within the State of Delaware.

Service Benefits: \$5 multiplied by years of credited service (not to exceed 25 years) per month.

Vesting: 10 years of credited service.

Retirement: Age 60 with 10 years credited service.

Disability Benefits: Not applicable.

Survivor Benefits: Not applicable.

Contributions:

Employer - determined by Board of Pension Trustees. Employer contributions were \$445.19 and \$450.30 per member for the Fiscal Year of 2019 and 2018, respectively. *Volunteer Member* - \$60 per member per calendar year.

Burial Benefit: Not applicable.

Closed Diamond State Port Corporation Plan

- **Plan Description and Eligibility:** The Closed Diamond State Port Corporation Pension Plan is a single-employer defined benefit plan which covers all employees of the State Port Corporation.
- Service Benefits: 1.75% of final average monthly compensation multiplied by the years of credited service (not to exceed 30 years).For this plan, final average monthly compensation is the monthly average of the highest consecutive five years of compensation within the last ten years of employment.

Vesting: 5 years of credited service. Automatic for all employer contributions up to date of freeze.

- **Retirement:** Age 65 with 5 years of credited service; or age (not less than 55 years) plus credited service equals 90.
- **Disability Benefits:** Same as Service Benefits. Employee must have 15 years of credited service.
- **Survivor Benefits:** If employee is receiving a pension, the eligible survivor receives 50% of pension; if employee is active with at least 15 years of credited service, then eligible survivor receives 50% of pension the employee would have received at age 65.

Contributions:

Employer - determined by the Board of Pension Trustees. Employer contributions were 9.5% and 8.4% of earnings for the Fiscal Year 2019 and 2018, respectively. *Member* - 2% of compensation.

Burial Benefit: Not applicable.

Plan Status: Frozen as of October 3, 2018.

Benefits/Refunds: Processed in accordance with existing plan provisions.

Closed State Police Pension Plan

- **Plan Description and Eligibility:** The Closed State Police Pension Plan is a single-employer defined benefit plan that covers all State police officers appointed before July 1, 1980.
- **Survivor Benefits:** If employee is active or is receiving a service or service-related disability pension, the eligible survivor receives 75% of pension; if employee is receiving a non-service related disability pension, eligible survivor receives 50% of pension.

Contributions:

Employer - The Closed State Police Plan is funded on a pay-as-you-go basis.

Burial Benefit: \$7,000 per member.

2. Fund Descriptions and Contributions

County & Municipal Police and Firefighters' COLA Fund

During 1990, the State of Delaware established a mechanism for funding post-retirement increases granted by employers who participate in the County & Municipal Police and Firefighters' Pension Plan and manage a non-DPERS system "closed" pension plan for former employees.

Closed pension groups pertain to employees, for whom the employer elected not to become a part of the system when their employers joined the system. Currently, five employers maintain such closed groups. They include City of Dover, City of Elsmere, City of New Castle, City of Wilmington and New Castle County.

The COLA Fund is financed through a 0.25% tax on the value of certain homeowners' insurance premiums written within the State. The proceeds of the tax are directed into the Fund on a semi-annual basis and are managed by the Board of Pension Trustees (Board) for investment purposes. Unused amounts revert to the State General Fund after a period of 10 years per 80 Del. C419. Each participating employer receives an allocation of these contributions, earnings on investments of the Fund and expenses attributed to the Fund based on the headcount of retired members of its police force.

Any new employer, with a closed police pension plan, that joins the system is eligible to receive money from the COLA Fund ("Fund"). In accordance with 18 Del. C. S708(c), when a participating employer grants a post-retirement increase for a closed plan outside of the County & Municipal Police and Firefighters' Pension Plan, funds are transferred from the Fund to the trust account(s) of the closed pension group maintained by the employer. However, the entity must first provide 25% of the cost estimated by an actuary while the Fund provides the remaining 75% of the cost.

These increases are not the responsibility of DPERS. Each employer entity is solely responsible for any post-retirement increase granted even if the actuarial cost calculated at the onset of the increase exceeds the employer's share of the Fund's balance. There is no joint liability amongst existing employers.

Post-Retirement Increase Fund

The State of Delaware passed legislation which established a mechanism for funding ad hoc postretirement increases granted by the General Assembly to members retired under the State Employees' Plan, the New State Police Plan, and the Judiciary Plans (Closed and Revised) beginning in Fiscal Year 1994. The mechanism allows the State to appropriate actuarially determined employer contributions to a separate Post-Retirement Increase Fund (PRI) managed by the Board. With the exception of the Closed State Police Plan, projected benefit payments do not include the effects of projected ad hoc cost-of-living adjustments (ad hoc COLAs) as they are not substantively automatic. The primary considerations relevant to making this determination include the historical pattern of granting the changes and the consistency in the amounts of the changes. The actuary uses the current actuarial assumptions, methods, and population data to calculate the estimated additional liability resulting from granted ad hoc benefit increases. When the Legislature grants an ad hoc post-retirement adjustment, funds are transferred from this PRI Fund on a monthly basis based on a five-year actuarial funding schedule to the appropriate pension plan from which the additional benefits are disbursed. For the Fiscal Year ended June 30, 2019, \$11.3 million was transferred to the appropriate plans in the System.

As of June 30, 2019, recently granted post-retirement increases have outstanding liabilities totaling \$5.8 million, which are anticipated to be funded by the State and transferred to the appropriate plans over the next fiscal year as follows:

Fiscal Year 2020 \$ 5,833,800

The Board adopts actuarially determined funding for the Post-Retirement Increase Fund. Funding for Fiscal Year 2019 was 0.53% of covered payroll. Funding for Fiscal Year 2020 will be 0.27%.

Local Government Retirement Investment Pool

In June 1996, the State of Delaware established the Delaware Local Government Retirement Investment Pool (DELRIP) in the custody of the Board to allow local governments within the State of Delaware the option to pool their pension assets with the System for investment purposes. The DELRIP is an external investment pool that allows local governments to potentially maximize their rate of return and reduce administrative expenses related to the investment of funds. Participation in the pool is voluntary. There were three participating entities in DELRIP as of June 30, 2019, which comprise the pool in its entirety: Sussex County, Town of Elsmere and Town of Newport.

DELRIP is subject to the oversight of the System's Investment Committee and not subject to the regulatory oversight of the Securities and Exchange Commission (SEC). The System has not provided or obtained any legally binding guarantees during the year to support the value of shares. The fair value of the pool is determined in the same manner as the value of the Master Trust shares (see Note 4). Since this pool is a portion of the total System, the same accounting and investment policies described in the following financial footnotes apply.

3. Summary of Significant Accounting Policies

The accompanying financial statements of the Delaware Public Employees' Retirement System (DPERS or the System) have been prepared in conformity with Accounting Principles Generally Accepted in the United States (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

Basis of Accounting

The financial statements are presented on the accrual basis. Employer contributions to each plan are recognized when due pursuant to legal requirements. Benefits and refunds are recognized when due and payable in accordance with the terms of each Plan or Fund.

The accompanying financial statements include certain prior year summarized comparative information. Such information does not include sufficient detail to constitute a presentation in conformity with U.S. generally accepted accounting principles.

Method Used to Estimate Values

Management of the System has made certain estimates and assumptions relative to the reporting of assets and liabilities, and the disclosure of contingent assets and liabilities, to prepare these financial statements in conformity with U.S. generally accepted accounting principles. Actual results could differ from those estimates.

Administrative Expenses

General expenses for the administration of the System are budgeted and approved as part of the annual State budget process and are paid from the assets of the System. Expenses for some professional services, including outside legal counsel, auditor, investment manager, investment advisor, and actuarial services are paid directly from the System. In addition, the Board reviews and approves proposals for one-time, special projects as they arise. The cost of administrative expenses for the System are financed through plan contributions and investment earnings.

4. Fair Value Measurements

All of the investment assets of the Plans and Funds, with the exception of the Delaware Volunteer Firemen's Fund (which is a length of service award plan), are pooled and invested in a common Master Trust. Each of the Plans or Funds described herein shares in the Master Trust based on funds contributed and earnings/(losses) allocated. The investment assets of the Delaware Volunteer Firemen's Fund are separately invested in a short-term investment fund, and in domestic equity, domestic fixed income, and international stock index funds.

Pooled investments are funds wherein the System owns units or shares of commingled equity, fixed income, and cash funds. These investments are redeemable with the underlying funds at net asset values (NAV) under the terms of the trust, partnership and/or subscription agreements. As of June 30, 2019, fixed income items classified as cash equivalents include \$30.6 million in short-term investments and \$669.6 million in pooled investments. The fair value of other pooled investments totaled \$2,889.8 million. The asset allocation (in millions) was \$1,048.4 in domestic fixed income, \$1,022.9 in domestic equity, and \$818.5 in international equity.

Alternative investments are ownership interests in investment limited partnerships or private LLCs, some of which may be illiquid. As of June 30, 2019, alternative investment values of \$2,303.1 million represent 22.4% of the System's net position.

The fair value of the System's investments is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values for fixed income and equity securities are derived from published market prices and quotations from national security exchanges or security pricing vendors. Where published prices, quotations, or vendor prices are not available, alternate valuation methods are used.

The System categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The System's assessment of the significance of particular inputs to these fair value measurements requires judgment and considers factors specific to each asset or liability.

Equity and Fixed Income securities classified in Level 1 are valued using prices quoted in active markets for those securities.

Equity securities classified in Level 2 are valued using the latest available estimates of price bids or actual price bids quoted in active and inactive markets for those securities.

Fixed Income securities and pooled investments classified in level 2 are valued using other inputs including, but not limited to, interest rates and yield curves that are observable at commonly quoted intervals as well as the latest available estimates of price bids or actual bids quoted in active and inactive markets for those, or similar, securities.

Fixed Income securities classified in level 3 are privately placed subordinated notes, valued using a discounted cash flow model. Unobservable inputs include projected cash flows and the discount rate.

Pooled investments classified in Level 1 of the fair value hierarchy are investments in open-end, nonexchange-traded mutual funds for which fair value per share (unit) is determined and published and is the basis for current transactions. These securities are valued at their NAV on the date of valuation, and are classified as Level 1 in the fair value hierarchy since they may be purchased or sold at their publically quoted NAV on the date of valuation. The System has the following recurring fair value measurements as of June 30, 2019. Investments that are measured using the NAV per share (or its equivalent) as a practical expedient to fair value are not classified in the fair value hierarchy below.

Investments by Fair Value

(dollar values expressed in thousands)

	J	une 30, 2019	Level 1	Level 2	I	evel 3
Equity Securities:						
Common Stock	\$	2,554,579	\$ 2,551,808	\$ 2,771	\$	-

Indexed Linked Government Bonds		366,967	-	366,967		-
Municipal/Provincial Bonds		3,156	-	3,156		-
Total Fixed Income Securities	\$	1,719,952	\$ -	\$ 1,718,900	\$	1,052
Pooled Investments:						
Equity Funds	\$	93,644	\$ 93,644	\$ -	\$	-
Fixed Income Funds		8,556	8,556	-		-
Total Pooled Investments	\$	102,200	\$ 102,200	\$ -	\$	-
Total Investments by Fair Value Level		\$4,388,129	\$ 2,663,322	\$ 1,723,755	\$	1,052
Total Investments Measured at NAV	\$	5,090,672				
TOTAL INVESTMENTS MEASURED AT FAIR VALUE	\$	9,478,801				

The valuation method for pooled and alternative investments that do not have a readily determinable fair value is such that the System establishes fair value by using the NAV per share (or its equivalent), such as member units or an ownership interest in partners' capital to which a proportionate share of net assets is attributed. These values are calculated by the management of each investment fund as of the System's measurement date, generally in a manner consistent with the Financial Accounting Standards Board's measurement principles for investment companies. The NAV received from each investment fund are reviewed by Pension Office staff and its investment advisor; and both the System's management and the custodian receive periodic and audited annual financial reports from the management of each investment fund.

The System has the following recurring NAV measurements as of June 30, 2019. Excluded from pooled investments below is a short-term stable value fund that the System classifies as Cash Equivalents in the amount of \$669.6 million. The short-term investment fund is a stable-value (money market-like) investment vehicle for cash reserves, which the System classifies as Cash Equivalents. It is managed by the System's Custodian to offer a competitive rate of return through a portfolio of obligations of the U.S. Government, its agencies or instrumentalities, and related money market instruments. Principal preservation and liquidity management are the prime objectives. At year end, the NAV, unfunded commitments, and redemption terms are as follows:

Investments Measured at NAV

(dollar values expressed in thousands)

	Fair Value		J nfunded mitments ⁽¹⁾	Redemption Frequency (if currently available)	Redemption Notice Period
Pooled Investments:	Fair value	COI	mmunchts	(ii currently available)	renou
Equity Funds	\$ 1,747,744	\$	-	Daily, Monthly	1 to 30 days
Fixed Income Funds	1,039,833		-	Daily	1 day

Private Debt	31,599		56,330		
Private Equity	1,066,105		316,057		
Real Assets	246,786		106,473		
Total Alternatives	\$ 2,303,095				
Total Investments Measured at NAV	\$ 5,090,672				

1. Unfunded Commitments. The System has commitments to invest additional amounts, to be drawn down as called upon at any time during the term of each relationship. The lengths of these terms are discussed below. Generally, these commitments are self-funding; in that the capital calls are met using cash flows generated by distributions received from alternative investment funds as the underlying investments of the funds are liquidated.

2. Pooled Investments. This type includes three index tracking funds and four global value equity funds. The index funds maintain a portfolio constructed to match or track the components of the following market indices: S&P 500, Russell 1000 Value and the Bloomberg Barclays Capital U.S. Aggregate. The global value equity funds invest in both U.S. and non-U.S. equities, seeking quality companies that are attractively valued and have growth potential.

3. Credit/Distressed Debt Focused Strategy. This type includes three funds that engage in multiple investment strategies across the credit spectrum, with the objective of achieving superior risk-adjusted returns through opportunistic investment. The composite portfolio for this type includes investments in distressed corporate securities, convertible hedging, residential and consumer debt, real estate debt, merger arbitrage, and real estate. In limited circumstances, these funds have the ability to impose a suspension or postponement of redemptions (a "gate"), or in the case of a withdrawal greater than 90% they may hold up to 10% of the redemption amount (a "holdback") until the completion of the funds' annual audit. There have been no gates imposed during the reporting period. These funds may also segregate a portion of the portfolio, commonly illiquid securities with no active market, from other investments of the portfolio (a "side pocket"). Investments in a side pocket are redeemable only upon liquidation of the underlying assets

in the side pocket. Investments representing approximately 11% of the value of the investments in this type are held in side pockets.

4. Equity Focused Strategy. This type includes two funds that engage in equity investing strategies. The composite portfolio for this type invests both long and short in global common stocks, but also in debt, credit, private equity, derivative and other financial instruments. In limited circumstances, these funds have the ability to impose a gate, or in the case of a withdrawal greater than 95% they may hold back up to 5% of the redemption amount until the completion of the funds' annual audit. These funds may also segregate a portion of the portfolio in a side pocket. Investments in a side pocket are redeemable only upon liquidation of the underlying assets in the side pocket. Investments representing approximately 54% of the value of the investments in this type are held in side pockets. Investments representing approximately 100% of the value of the investments in this type cannot be redeemed because the investments include an initial lock-up that does not allow for redemption in the first five years after acquisition. The remaining restriction period for these investments is approximately 15 months at June 30, 2019.

5. *Multi-Strategy*. This type of fund is such that may invest in a wide range of asset classes in order to meet fund objectives. In limited circumstances, this fund has the ability to impose a suspension or postponement of redemptions (a "gate"), or in the case of a withdrawal greater than 90%; may hold back 10% for approximately 15 days while the fund NAV is being finalized. There have been no gates imposed during the current reporting period.

6. Funds Primarily Invested in Private Securities. These investments can never be redeemed with the funds. Instead, the nature of the investments in these types is that distributions are received through the liquidation of the underlying assets of the funds. It is expected that the underlying assets of the funds will be liquidated over the next 1 to 14 years. The strategy of each type is as follows:

Buyout. This type includes four funds that make equity investments in mature, private companies.

- *International.* This type includes 14 funds that invest in private equity and buyout strategies operating principally outside of the U.S.
- <u>*Private Debt.*</u></u>. This type includes seven funds that invest in debt or equity securities of financially stressed (distressed) companies, as well as convertible bonds and subordinated debt in private companies.
- <u>Private Equity</u>. This type includes 52 funds that invest in the equity securities of growing private companies, primarily in the technology and healthcare sectors.
- <u>*Real Assets.*</u> This type includes six funds that invest in commercial real estate and private energy companies including commercial real estate, exploration and production, midstream, power and services businesses.

5. Net Pension Liability of Employers

The components of the Net Pension Liability/(Asset) of each Plan as of June 30, 2019 were as follows: *(dollar values expressed in thousands)*

Plan	(1) Total Pension Liability	(2)Plan Fiduciary Net Position	(3) Employers' Net Pension Liability/(Asset) (1) - (2)	(4) Plan Fiduciary Net Position as a % of the Total Pension Liability (2)/(1)	(5) Covered Payroll	(6) Net Pension Liability/(Asset) as a % of Covered Payroll (3)/(5)
State Employees'	\$10,673,881	\$ 9,116,517	\$1,557,364	85.4%	\$ 2,075,676	75.0%
Special	104	171	(67)	164.4%	N/A	N/A
New State Police	560,499	494,501	65,998	88.2%	65,214	101.2%
Judiciary	81,002	85,880	(4,878)	106.0%	10,725	(45.5)%
County & Municipal Police and Firefighters'	425,552	396,829	28,723	93.3%	88,400	32.5%
County & Municipal Other Employees'	63,117	58,536	4,581	92.7%	44,420	10.3%
Closed Diamond State Port Corporation	34,257	32,870	1,387	96.0%	N/A	N/A
Closed State Police+	365,113	2,667	362,446	0.7%	N/A	N/A

					Active Members ⁺⁺	UAAL Per Active Member ⁺⁺
Delaware Volunteer Firemen's	\$ 34,582	\$ 21,677	\$ 12,905	62.7%	4,361	\$2,959

+The Closed State Police Plan is a pay-as-you-go plan.

++Not expressed in thousands.

The Schedule of Changes in Net Pension Liability, presented on pages 51-59 is required supplementary information (RSI) following the Notes to the Financial Statements.

6. Plan Actuarial Assumptions

The total pension liability was determined by an actuarial valuation as of June 30, 2018, and update procedures were used to roll forward the total pension liability to June 30, 2019. The following actuarial assumptions were used, applied to all periods included in the measurement:

Plan	State Employees'	Special	New State Police	Judiciary	Closed State Police
Actuarial Assumptions:					
Investment rate of return/Discount rate ⁽¹⁾	7.0%	7.0%	7.0%	7.0%	3.5%
Projected Salary Increases ⁽¹⁾	2.5% + Merit	N/A	2.5% + Merit	2.5% + Merit	N/A
Cost-of-living adjustments	0.0%	0.0%	0.0%	0.0%	2.5%
Plan	County & Municipa Police an Firefighter	l d	County & Municipal Other Employees'	Delaware Volunteer Firemen's	Closed Diamond State Port Corporation
Actuarial Assumptions:					
Investment rate of return/Discount rate ⁽¹⁾	7.09	%	7.0%	7.0%	7.0%
Projected Salary Increases ⁽¹⁾	2.5% + Mer	it	2.5% + Merit	N/A	N/A
Cost-of-living adjustments	0.09	%	0.0%	0.0%	0.0%

(1) Inflation is included at 2.5%.

The total pension liabilities are measured based on assumptions pertaining to the interest rates, inflation rates and employee demographic behavior in future years. It is likely that future experience will not exactly conform to these assumptions. To the extent that actual experience deviates from these assumptions, the emerging liabilities may be higher or lower than anticipated. The more the experience deviates the larger the impact on future financial statements.

Mortality assumptions are based on the RP-2014 tables with gender adjustments for healthy annuitants and disabled retirees and an adjusted version on MP-2015 mortality improvement scale on a fully generational basis.

With the exception of the Closed State Police Plan, projected benefit payments do not include the effects of projected ad hoc cost-of-living adjustments (ad hoc COLAs) as they are not substantively automatic. The primary considerations relevant to making this determination include the historical pattern of granting the changes and the consistency in the amounts of the changes.

The long-term expected rate of return on pension plan investments was determined using a buildingblock method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by an asset allocation percentage which is based on the nature and mix of current and expected plan investments, and by adding expected inflation. Best estimates of geometric real rates of return for each major asset class included in the System's current and expected asset allocation as of June 30, 2019 are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic Equity	5.7%
International Equity	5.7
Fixed Income	2.0
Alternative Investments	7.8
Cash & Equivalents	

Discount rate. The discount rate for all plans, except Closed State Police, used to measure the total pension liability was 7.0 percent. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rates and that contributions from employers will be made at rates determined by the Board of Pension Trustees, actuarially determined. Based on those assumptions, the pension plans' fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The Closed State Police Plan used a discount rate of 3.5%, which represents the 20-year AA Municipal Bond rate since this plan is pay as you go.

Sensitivity of the net pension liability/(asset) to changes in the discount rate. The following presents the net pension liability/(asset) of the Plans, calculated using the discount rate of 7.0 percent (3.5% for Closed State Police), as well as what the Plans' net pension liability/(asset) would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	1% Decrease	Discount Rate	1% Increase
Plans	(6.0%)	(7.0%)	(8.0%)
State Employees'	\$2,813,184	1,557,364	502,860

Total	\$3,491,743	2,028,459	802,230

(dollar values expressed in thousands)

7. Deposits and Investments

Investment Policy

The Board of Pension Trustees is authorized by 29 Del. C. § 8308 to maintain and invest the funds of the System. There are no State statutes limiting allowable investments for the System. The investment decisions are dictated by the prudent person rule and the internal investment guidelines which are established, and may be amended by the Board as outlined below:

- Allocate a minimum of 20% of assets to fixed income investments such as bonds, cash equivalents, and certain real estate investments
- Maintain a diversified portfolio, to minimize the risk of overexposure in any one market segment or investment style
- Monitor the performance of all investment managers using specific benchmarks
- Control exposure in illiquid asset classes
- Review, re-examine, and reconfirm the operation of results of the investment process regularly
- Identify new long-term opportunities for risk reduction and improved investment returns
- Review actuarial assumptions to ensure consistency with capital market expectations.

The Board delegates the operation of the System's investments to the Investment Committee. The Committee establishes asset allocations to various investment markets. The following were the System's adopted asset allocation ranges as of June 30, 2019:

	Percent of Total Fund Allocation (1)				
Asset Class	Minimum	Maximum			
Marketable Investments					
Equity	20%	80%			
Fixed Income (including Cash) ⁽²⁾	20%(2)	80%			
Total Marketable Investments	30%	100%			
Alternative Investments					
Illiquid Investments	0%	30%			
Other Diversification Strategies	0%	20%			
Total Alternative Investments	0%	30%			
Total Fund	1	.00%			

(1) The Fund will rarely be fully invested at the minimum or maximum limits, and some assets will be held in cash.
(2) A minimum of 15% of the Fund is to be invested in investment grade fixed income securities or cash equivalents.

The current policy was adopted by the Board on September 28, 2018. There were no significant changes to the policy from the prior version.

For the Fiscal Year ended June 30, 2019, management of the System believes it has operated in all material respects in accordance with these policies.

Within the broad asset allocation ranges noted above, the System does not rebalance to a specific target allocation. While the System does not utilize a target allocation approach, the following is the average asset allocation for the 10-year period ended June 30, 2019, which is representative of the nature and mix of current and expected System investments.

Asset Class	10-year Average Allocation
Domestic Equity	34.0%
International Equity	12.5%
Fixed Income	25.3%
Cash & Short-Term	5.6%
Alternative Investments	22.6%
	100.0%

Rate of Return

The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested. For the year ended June 30, 2019, the annual money-weighted rates of return on pension plan investments, net of pension plan investment expenses, were as follows:

Plan	Money-Weighted Rate
State Employees'	4.7%
Special	4.5%
New State Police	4.8%
Judiciary	4.8%
County & Municipal Police and Firefighters'	4.7%
County & Municipal Other Employees'	4.8%
Delaware Volunteer Firefighters	7.1%
Closed Diamond State Port Corporation	4.6%
County & Municipal COLA	5.5%
Post-Retirement Increase Fund	5.2%
DELRIP-Sussex Co.	5.5%
DELRIP-Elsmere	4.7%
DELRIP-Newport	4.7%
Closed State Police	2.3%

Securities Lending

Effective October 15, 2013, the System entered into a security lending agreement with its custodian bank, which acts as security lending agent for the System. The objective of securities lending is to earn income through a conservatively operated and well-controlled program. The custodian is authorized to lend securities within the borrower limits and guidelines established by the System. The System lends fixed income, domestic equity, and international equity securities to approved broker/dealers. Collateral for securities loaned equals 101 percent of fair market value for domestic securities and 105 percent for international securities.

The only types of collateral received from borrowers are obligations issued by the U.S. Government. All rights of ownership to securities pledged as collateral remain with the borrower except in the event of default. The System has the authority to sell collateral securities only upon a borrower default. As of June 30, 2019, there were no violations of legal or contractual provisions. The System has not experienced any losses resulting from the default of a borrower or lending agent during the year ended June 30, 2019.

At year-end, the System has no credit risk exposure to borrowers because the amounts the System owes the borrowers exceed the amounts the borrowers owe the System. The contract with the System's custodian requires it to indemnify the System if the borrowers fail to return the securities or fail to pay the System for income distributions by the securities' issuers while the securities are on loan. The System manages its market risk by recording investments at fair value daily and maintaining the value of the collateral held by the System in excess of the value of the securities loaned. As of June 30, 2019, the fair value of securities on loan was \$97.0 million. The associated collateral was \$99.0 million.

All open security loans can be terminated on demand by either the System or borrower. The collateral is valued at fair value obtained from independent pricing services.

Investments

The following is a listing of fixed income investments and cash equivalents and related maturity schedule which shows the System's exposure to interest rate risk as of June 30, 2019. The System holds \$2,001.0 million in domestic fixed income and \$87.0 million in foreign fixed income instruments. The table below also includes \$669.6 million in pooled stable value fund, \$30.6 million in short term bills and notes collectively reported as cash equivalents, and \$1,048.4 million in pooled fixed income investments. These are reported on the Statement of Fiduciary Net Position, respectively, as cash and equivalents and pooled equity and fixed income.

Investment Type		Fair Value	Less than 1	1 - 6	6 - 10	10 +

Investment Maturities (in Years) (expressed in thousands)

Interest Rate Risk

The State has delegated investment policy for the System to the Board and its Committees. The Investment Committee sets its own guidelines in conjunction with the Board to manage and review the System's exposure to fluctuating interest rates. Interest rate risk is a consideration when establishing and reviewing investment manager guidelines and asset allocation. Both topics are included in the statement of Investment Policies and Objectives which are published on the System's web site.

Custodial Credit Risk

<u>Deposits</u>

For deposits, custodial credit risk is the risk that, in the event of the failure of a depository financial institution, the deposits or collateral securities may not be recovered from an outside party. At June 30, 2019, the \$793.2 million carrying amount of the System's cash and cash equivalents was comprised of \$700.2 million of short-term investments and \$93.0 million in deposits. Of the \$93.0 million in deposits, \$92.1 million was subject to custodial credit risk because it was held by outside institutions and uninsured and uncollateralized. The remaining \$0.9 million was held as pooled cash management account by the State Treasurer's Office, which includes deposit accounts, short- and long-term investments.

Investments

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the value of the investment or collateral securities that are in the possession of an outside party may not be recovered. Investments are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by either the counterparty or the counterparty's trust department or agent but not in the government's name. The System's investments are not exposed to custodial credit risk as they are held by the System's custodian in the name of the System or its nominee.

Credit Risk

The System's general investment policy is to apply the prudent-person rule to all risks incurred by the fund. Investments are made as a prudent person would be expected to act, with discretion and intelligence, to seek reasonable income, preserve capital and, in general, avoid speculative investments. The System has no investment policy that would further limit its investment choices related to credit risk. As of June 30, 2019, the System's fixed income investments and cash equivalents had the following credit risk characteristics:

Investment Concentration Risk

As of June 30, 2019, the System held no concentration of investments (excluding pooled investments) in an individual issuer in excess of 5% of the fair value of the System's net position.

Management Fees

In addition to the \$23.0 million paid in Manager/Advisor fees shown in the Statement of Changes in Fiduciary Net Position, the System paid \$32.0 million in management fees to the alternative investment funds and partnerships for the Fiscal Year ended June 30, 2019. These fees are netted against investment income.

Foreign Investments

Foreign investments include equity securities, bonds, and cash and cash equivalents. The following is a listing of foreign assets included in the Statement of Fiduciary Net Position as of June 30, 2019. The listing includes \$2.0 million of fixed income investments of domestic issuers which have been classified as domestic on the Statement of Fiduciary Net Position, but are denominated in a foreign currency.

Derivatives

Derivatives are instruments (securities or contracts) whose value is dependent on such things as stock or bond prices, interest rate levels, or currency exchange rates. The Board adopted a formal written policy on the use of derivatives which is reviewed periodically and incorporated in the formalized investment policy adopted by the Board. Some selected managers are permitted to use derivatives. In every case, the types of derivatives used and limits on their use are stated in the manager's contract and are monitored on an ongoing basis. Derivatives serve a variety of useful purposes for the System, including the reduction of foreign exchange risk, the minimization of transaction costs and as a means of implementing value added strategies to enhance returns. If the use of derivatives in a portfolio strategy results in some leverage, that leverage is never permitted to expose the Fund to a loss greater than the amount committed to that strategy.

The following lists principal categories of derivatives and their possible uses during the year:

Category	Purpose
Foreign exchange forward contracts	Hedge currency risk of investments denominated in foreign currencies; enhance return
Exchange traded futures contracts	Reduce transaction costs; hedge equity market risk; control fixed income; counterbalance portfolio duration; enhance return
Exchange traded options contracts	Enhance return; reduce transaction costs
Total return equity swaps	Hedge equity market risk exposure

Generally, derivatives are subject both to market risk and counterparty risk. The derivatives utilized by the System typically have no greater risk than their physical counterparts, and in many cases are offset by exposures elsewhere in the portfolio (for example, a short S&P 500 futures contract partially hedging a long position in S&P 500 securities). Counterparty risk, the risk that the "other party" to a contract will default, is managed by utilization of exchange traded futures and options where practical (in which case the futures exchange is the counterparty and guarantees performance) and by careful screening of counterparties where use of exchange traded products is impractical or uneconomical.

Derivative securities are priced and accounted for at their fair value. For exchange traded securities such as futures and options, closing prices from the securities exchanges are used. Foreign exchange contracts are valued at the price at which the transaction could be settled by offset in the forward markets.

The Investment Committee monitors the System's derivative holdings on a regular basis to ensure that the derivatives used by managers of the System will not have a material adverse impact on its financial condition. Total derivative instruments at June 30, 2019 were not material to the System.

Risk and Uncertainty

The Plan invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk inherent in investment securities, it is possible that changes in the values of investment securities will occur in the near term and that such changes could affect the amounts reported in the Statement of Fiduciary Net Position.

8. Tax Status

The System currently operates seven of its plans as tax qualified governmental retirement plans under the Internal Revenue Code ("IRC"). The seven plans include the State Employees', New State Police, Judiciary, County & Municipal Police and Firefighters', County & Municipal Other Employees', and Closed Diamond State Port Corporation, and Closed State Police ("Qualified Retirement Plans"). The Internal Revenue Service made favorable determinations by letters dated April 23, 2014 for the State Employees', New State Police, Judiciary, County & Municipal Police and Firefighters', County & Municipal Other Employees', and April 28, 2014 for the Closed State Police that the Qualified Retirement Plans are designed in accordance with applicable sections of the IRC. The Closed Diamond State Port Corporation received a favorable determination letter and compliance statement dated August 28, 2014. The System and its tax counsel believe the Qualified Plans are designed and are currently being operated in compliance with the applicable provisions of the IRC. The favorable determination letters for the Qualified Retirement Plans include an expiration date of January 31, 2019. Effective January 2017, the Internal Revenue Service ("IRS") eliminated the staggered five-year remedial amendment cycle for individually designed qualified retirement plans. As of that date, the IRS no longer accepts applications for determination letters based on the five-year remedial amendment cycle system. In general, the IRS' current determination letter program provides that a plan sponsor that maintains a qualified plan which has been issued a favorable determination letter may continue to rely on the determination letter with respect to any plan provision, until such time that the plan provision is subsequently amended or affected by a change in law. Expiration dates included in determination letters issued before January 4, 2016, are no longer operative. DPERS tax counsel, Ice Miller, has reviewed the plans and prepared a Compliance Review Report which finds that no plan amendment is required for any of the DPERS Qualified Retirement Plans.

The Delaware Volunteer Firemen's Fund ("Firemen's Fund") operates as a length of service award plan under IRC section 457(e)(11). The Firemen's Fund received a favorable private letter ruling from the Internal Revenue Service ("IRS") on January 13, 2009. Additionally, the System submitted a private letter ruling request in November 2012 with respect to the establishment of the Delaware Public Employees' Retirement System Qualified Excess Benefit Arrangement Plan and Trust, ("QEBA"). On June 16, 2015, the System received a favorable letter ruling, which concluded that the QEBA was a qualified excess benefit arrangement pursuant to Sec. 415(m) of the IRC, and that benefits payable pursuant to the plans will be includible in gross income in the year that they are paid or otherwise become available to a participant or participant's beneficiary, and that income accruing to the QEBA plans is exempt from federal income tax as income derived from an essential government function.

On November 16, 2018, the Board of Pension Trustees adopted a resolution which transferred assets of the OPEB Trust into the DPERS trust for the purposes of investment, as authorized by IRS Revenue Rule 81-100, 2011-1, Notice 2012-16 and Revenue Ruling 2014-24.

Notes to Required Supplementary Information

Factors that significantly affect trends in amounts reported. For the periods presented, there were no changes of benefit terms or, changes in the size or composition of the population covered by the benefit terms which significantly affect trends in the amounts reported. The changes in assumptions used to determine total pension liability are described in Note 5 of the financial statements.

Method and assumptions used in calculations of actuarially determined contributions. The actuarially determined contribution rates in the Schedule of Employers' Contributions are calculated as of June 30, two years prior to the end of the fiscal year in which contributions are reported, with the exception of Special, Delaware Volunteer Firemen, Closed Diamond State Port and Closed State Police plans whose contributions are calculated one year prior to to the end of the fiscal year. Complete descriptions of the methods and assumptions used to determine contribution rates for Fiscal Year 2019 can be found in the June 30, 2017 (2018 for Special, Delaware Volunteer Firemen, Closed Diamond State Port and Closed State Police plans) actuarial valuation reports. The following actuarial methods and assumptions were used to determine contribution rates reported in that schedule:

	State		New State		Closed State
Plan	Employees'	Special	Police	Judiciary	Police

Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

Board of Pension Trustees Delaware Public Employees' Retirement System Dover, Delaware

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the combining statements of fiduciary position and changes in fiduciary net position of the Delaware Public Employees' Retirement System (the System), a component unit of the State of Delaware, as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the System's basic financial statements as listed in the table of contents, and have issued our report thereon dated November 15, 2019.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the System's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control. Accordingly, we do not express an opinion on the effectiveness of the System's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the System's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Board of Pension Trustees Delaware Public Employees' Retirement System Page 2 of 2

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the System's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

September 10, 2019

Dear Board Members, Participants, and Beneficiaries:

The Board of Pension Trustees' Investment Committee oversees the investment of the retirement funds of the Delaware Public Employees' Retirement System (System). The Investment Committee's investment oversight includes the nine plans/funds [State Employees', Special, New State Police, Judiciary, County & Municipal Police and Firefighters', County & Municipal Other Employees', Delaware Volunteer Firemen's, Diamond State Port Corporation, and Closed State Police]. In addition, the Investment Committee also oversees the three commingled pension investment funds [County & Municipal Police/Firefighters' COLA, Post-Retirement Increase (PRI), Delaware Local Government Retirement Investment Pool (DELRIP)]. The Investment Committee consists of seven members appointed by the Board. The Investment Committee seeks to achieve the following investment objectives established by the Board:

- To realize a real return of 3% per year over long periods
- To manage portfolio risk so as to limit downside price fluctuation of the total System portfolio
- To realize as high a rate of total return as possible consistent with the above.

While not governed by mandated target asset allocations, investment decisions are shaped by the Board's internal investment guidelines which provide for a minimum of 20% of the total assets of the System to be invested in fixed income investments, such as bonds and cash equivalents. The Investment Committee continuously reviews expected rates of return and risk levels for all asset classes and seeks to construct portfolios consistent with the System's return objectives and risk management guidelines. The Investment Committee strives for appropriate investment diversification by allocating funds across a variety of asset classes and by selecting managers whose demonstrated performance reflects different management styles and asset class expertise. The performance of all investment managers is closely monitored, not only in relation to specific absolute objectives, but also in relation to other fund managers following the same or similar investment objectives. All Investment guidelines are monitored with the assistance of the Investment Advisor.

Board Members, Participants and Beneficiaries Page 2 September 10, 2019

The dedicated members of the Investment Committee met fifteen times over the course of the fiscal year. The System's investments continued to be allocated with a focus on liquidity and risk management. The System took advantage of strength in credit and equity markets to provide for liquidity needs and to manage overall portfolio volatility and risk. While there was a slight increase in the fixed income allocation during the year, moves were made to increase quality and diversification. The overall duration of the fixed income portfolio, a measure of its sensitivity to changes in interest rates, was maintained at a level shorter than the broad fixed income market due to unattractively low interest rates. Seven manager accounts were closed and four new manager accounts were opened during the fiscal year. To help maintain exposure to private investments there were nine new commitments to private investment funds during the year.

For the year ending June 30, 2019, the System's assets had a net increase of \$156.3 million, with investment gains comprising \$472.8 million. The Fund's investment return for the 2019 fiscal year was 5.0%. The return reflects a difficult comparison with last year's results, which included a large net appreciation of the System's Private Equity portfolio totaling \$202.0 million, recognized at the prior fiscal year-end. Excluding this adjustment, the Fund's return was 7.1%. The total System's annualized returns for the last 5, 10, 15 and 20 years are 5.8%, 9.6%, 7.6% and 6.9%, respectively, comfortably achieving the Fund's long-term real return objective of 3% over inflation. The System's performance ranks in the TUCS large public plan universe are second quartile for the ten-year period and fourth quartile for the five-year period ending June 30, 2019. The System's longer-term results have been achieved with lower observed return volatility than the median for the universe, reflecting the System's longstanding focus on risk management.

We thank our dedicated professional staff at the Office of Pensions, our Investment Advisor, our custodian bank, and our money managers, who all work diligently to ensure the successful operation of the Board of Pension Trustees' Investment Committee.

Respectfully submitted,

42/54

George J. Saxon, Chair Board of Pension Trustees' Investment Committee

Investment Activity and Economic Climate

Despite signs of slowing global growth and heightened volatility in late 2018, fiscal year 2019 provided positive returns across most asset classes. Market direction throughout much of the year was dictated by the direction of monetary policy as well as the trade dispute between the US and China. Concerns the Federal Reserve's push towards tighter monetary policy may drive the US economy into a recession, combined with trade-related uncertainty and already slowing global growth sent equity markets sharply lower at the end of 2018. However, the direction of Fed policy quickly shifted, with expectations of continued interest rate hikes replaced by a "wait and see" approach and eventually by an openness to cut rates to help sustain the economic expansion. This shift, along with some signs of progress in the US and China trade spat, helped push equity and bond markets higher in the latter part of the fiscal year.

The current economic expansion, which began in 2009, is now the longest on record. While much progress has been made in the decade-old expansion which has recently seen the US unemployment rate fall to a 50-year low, the overall pace of growth has been more subdued compared to prior expansions. In response to growing uncertainties, and in an attempt to revive sluggish growth, the Federal Reserve, European Central Bank and Bank of Japan have all indicated a willingness to cut interest rates or resume bond buying programs.

Earnings growth was uneven across regions as the impact of the trade war and slowing global growth weighed on results. The passage of the Tax Reform and Jobs Act in late 2017 led to a pickup in US economic activity and provided a meaningful boost to corporate earnings results throughout 2018. So far in 2019, earnings growth, on average, has slowed as the impact of tax cuts has largely faded, though some large internet-related companies continue to post impressive results. Earnings growth for companies listed on international markets was generally weaker than results for domestic companies. While European companies are not directly involved in the US and China trade dispute, the region is heavily reliant on global trade and has seen a notable slowing in manufacturing activity. As has often been the case in recent years, US stocks outperformed as the Russell 3000 index gained 9.0%, while the MSCI All-Country ex-USA index of international stocks advanced 1.3%.

In fixed income markets, government bond yields ended the year at historically low levels, even as global equity markets are near their all-time highs. While government bond and equity prices typically move in opposite directions, prices for both asset classes benefitted from the shift to more accommodative monetary policies. Low inflation as well as rising uncertainties also served to boost demand for the relative safety of government bonds. Low US Treasury yields still offer attractive yields relative to an increasing amount of negative yielding debt across Europe and Japan. As parts of the yield curve have inverted, some short-term bonds now provide higher yields than longer-term bonds. Investors closely watch the yield curve's shape as an inverted curve has historically been a strong predictor of recessions, though it does not predict the timing of a recession. Credit spreads were little changed over the fiscal year and remained at historically low levels. For the year, the broad Bloomberg Barclays Universal bond index gained 8.1%, while the Bloomberg Barclays High Yield index was up 7.5% and the Bloomberg Barclays TIPS index advanced 4.8%.

Given the conditions described above, the System's investment portfolio maintained large exposures to public and private equities and smaller exposures to fixed income for the course of the year. Asset allocation moves during the year focused on trimming equity and credit market exposures in favor of higher quality fixed income in reaction to a combination of recent strong performance, and overall risk and liquidity management.

Looking forward to fiscal year 2020, markets face many risks. While the recent shift to easier monetary policy may help extend the economic cycle, it is also an indication that policymakers are concerned about underlying economic weaknesses. Manufacturing and business investment readings show activity has indeed slowed. However, as this is written, overall economic growth is positive, consumer spending is strong, and the labor market continues to tighten. In addition, the ongoing trade tensions between the US and China are likely to remain a threat to global growth. Even if there is a resolution to the trade dispute, relations between the world's two largest economies will likely remain tense as they compete for dominance in key technologies and industries. Political divisiveness in Washington and abroad, rising government budget deficits, as well as the recent rise in geopolitical tensions in the Middle East are also sources of uncertainty.

In the face of these uncertainties, we will continue to rely on the investment principles and risk management guidelines that have served us well in the past and do our best to execute a sound investment strategy for the benefit of the System's stakeholders, recognizing that risk management sometimes leads to lower returns, in exchange for more downside protection.

Investment Philosophy and Objectives

In the investment of public funds, adequate funding of employee pensions is a paramount concern. Excessive risk taking could jeopardize that funding. An appropriate balance must be struck between risks taken and returns sought to ensure the long-term health and affordability of the plans involved. For more than 40 years, the System has been managed to control the extent of downside risk to which assets are exposed while maximizing the potential for long-term gain.

Specific investment objectives are:

- Achieve a real return objective (DPERS return less CPI) of 3% over long periods (approximately 15 years)
- Manage portfolio risk by controlling downside price fluctuations of the Fund in any 12-month period
- Maximize total investment returns, consistent with Board objectives.

To achieve these objectives, these investment guidelines are employed:

- Allocate a minimum of 20% of assets to fixed income investments such as bonds, cash equivalents, and certain real estate investments
- Maintain a widely diversified portfolio, to minimize the risk of overexposure in any one market segment or investment style
- Monitor the performance of all investment managers using specific benchmarks
- Control exposure in illiquid asset classes
- Review, re-examine, and reconfirm the operation of the investment process regularly
- Identify new long-term opportunities for risk reduction and improved investment returns
- Review actuarial assumptions to ensure consistency with capital market expectations.

Investment Process

While the objectives and policies have been repeatedly reaffirmed, the implementation process undergoes continuous evolution. The increasing volume of investment information and the complexities of the global marketplace necessitate the continuous review of data, trends, and markets. Ongoing enhancements are employed in every aspect of investment management, from asset allocation decisions to manager selection and performance measurement.

Basis of Presentation

Investment returns for the total System are based on data made available by the fund's custodian, The Northern Trust Company (Northern Trust) and/or Investment Managers. These returns are calculated gross of directly paid fees, on a time-weighted basis in accordance with accepted practices. Valuations, where available, are based on published pricing from national securities exchanges. Returns for periods longer than one year are annualized.

General Management

During each year the Investment Committee, with Board of Pension Trustees' (Board) oversight, carries out a number of general management practices to assure that the appropriate policies, controls, and resources are in place. Areas that are reviewed at least annually include:

- Investment objectives and policies based on an analysis of cash flow and liabilities
- Management tools for decision making
- Long-term risk and return levels for various investment options
- Manager organization, performance, transaction costs, fees and expenses, proxy voting procedures, and adherence to investment philosophy
- System performance versus externally measured universes of similar funds
- Contacts with other leading state investment funds to compare management practices
- Policy objectives and performance of alternative investments (including limited partnerships, and private LLCs).

Investment Results

In Fiscal Year 2019, the investment process experienced:

- Fair value annual rate of return of 5.0% on the beginning of year investable balance and before investment expenses
- Benefit and expense payments exceeded net employer and member contributions by \$324.7 million
- Net investment gains of \$472.8 million (investment gains less investment expenses)
- Increase in fair value of investment portfolio from \$10.1 billion to \$10.3 billion
- Overall volatility well below that of an all common stock portfolio.

Fifteen-Year Total Investment Rates of Return

	Total Investment Portfolic)		
	Fair Value (in millions)	Time-Weighted Annual Rate of Return	Annual Consumer Price Index	Real Rate of Return
2010	\$6,362.1	14.4%	1.1%	13.3%
2011	\$7,638.1	24.3%	3.6%	20.7%
2012	\$7,530.0	2.0%	1.7%	0.3%
2013	\$8,097.1	11.1%	1.8%	9.3%
2014	\$9,232.3	17.5%	2.1%	15.4%
2015	\$9,297.9	3.9%	0.1%	3.8%
2016	\$8,860.8	(1.3%)	1.0%	(2.3%)
2017	\$9,494.5	11.3%	1.6%	9.7%
2018	\$10,109.5	10.6%	2.9%	7.7%
2019	\$10,265.4	5.0%	1.6%	3.4%
Five Year		5.8%	1.5%	4.3%
Ten Year		9.6%	1.7%	7.9%
Fifteen Year		7.6%	2.0%	5.6%

Periods Ended June 30, 2019

	(All Return	(All Returns Greater Than One Year Are Annualized)				
	Five Years	Ten Years	Fifteen Years			
Total Fund Return	5.8%	9.6%	7.6%			
S&P 500 Index Return	10.7%	14.7%	8.8%			
Excess Return vs. S&P 500 Index	(4.9%)	(5.1%)	(1.2%)			
Relative Risk vs. S&P 500 Index	45.4%	53.6%	56.7%			

Funds are invested for long-term results and each single year's returns must be viewed in relation to longer periods.

One investment objective is to achieve an annualized rate of total return over any 15-year period that is at least 3 percentage points greater than inflation. The most recent 15-year result is a real rate of return of 5.6% (7.6% system return less 2.0% CPI) measured on a time-weighted basis. During this period, risk, as measured by relative volatility, was approximately 56.7% of the level that would have been experienced by a fund invested 100% in the S&P 500. The real rate of return from such a 100% stock portfolio would have been 6.8% (8.8% S&P 500 less 2.0% CPI). While 15-year investment market returns have been characterized by increased volatility, the portfolio has been successful at meeting the real return objective of 3.0% (DPERS return less 3%) over the 15-year period.

Asset Allocation

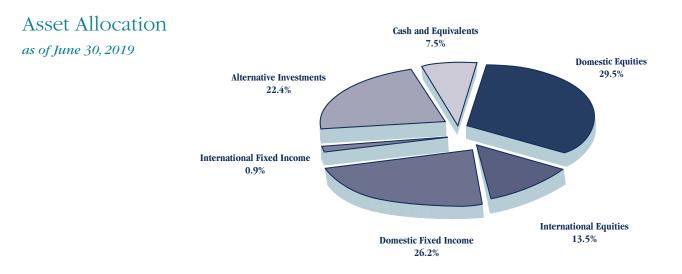

Funds are deployed in diverse asset classes offering the desired risk and return characteristics in an effort to achieve stated investment objectives. The accompanying table shows the most recent five-year history and trends in asset allocation. For these asset classifications, the Pooled Equity and Fixed Income accounts are included in their respective equity and fixed income asset classes and, therefore, are different from the asset classes used in the financial section on pages 24-25.

	2019	2018	2017	2016	2015
Domestic Equities	29.5%	30.7%	33.5%	33.6%	36.9%
International Equities	13.5%	13.9%	13.7%	10.2%	10.4%
Domestic Fixed Income	26.2%	22.5%	25.6%	29.2%	22.3%
International Fixed Income	0.9%	0.8%	1.0%	1.8%	1.9%
Alternative Investment	22.4%	24.4%	22.7%	22.2%	22.2%
Cash and Equivalents	7.5%	7.7%	3.5%	3.0%	6.3%

Individual investment managers are selected for each asset class based on a rigorous set of performance and organizational criteria. In addition to a proven track record of managing a given class of assets, they must have a clearly stated and consistently applied investment policy and decision making process, continuity of personnel, and a well-defined plan for retaining key personnel and controlling growth.

All investment managers are expected to maintain those organizational criteria in order to continue as managers.

The System's investments continued to be allocated with a focus on liquidity and risk management. The System took advantage of strength in credit and equity markets to provide for liquidity needs and to manage overall portfolio volatility and risk. While there was a slight increase in the fixed income allocation during the year, moves were made to increase quality and diversification. Manager activity over the fiscal year saw seven manager accounts closed and four new manager accounts opened, while three existing accounts were increased and 15 existing accounts were reduced. To help maintain exposure to private investments there were nine new commitments to private investment funds during the year.

At the end of the fiscal year, the money managers of the System and their responsibilities were:

* Other fees include Alternative Investment fees detailed on page 47. These fees have been excluded from the table above and the basis points calculation since they have already been netted from income. Basis point calculation is the weighted average based on the quarterly fund valuations.

Glossary of Terms Used

Fair Value:

The fair value of the System's investments is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair values for fixed income and equity securities are derived from published market prices and quotations from national security exchanges or security pricing vendors. Where published prices, quotations, or vendor prices are not available, alternate valuation methods are used.

Time-Weighted Total Return:

The measure used for judging investment management of the System. It is based on fair value and minimizes or eliminates any distortion in the rate of return caused by the timing of cash flows into or out of the System.

Alternative Investments:

Alternative investments are ownership interests in investment limited partnerships or private LLCs, some of which may be illiquid.

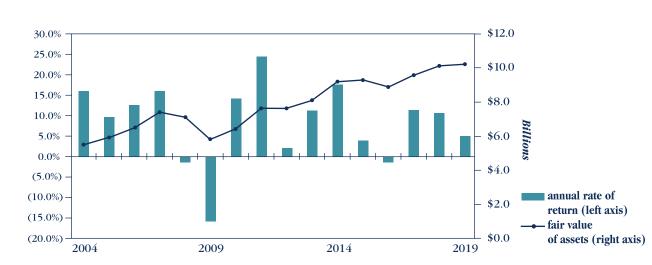

Schedule of Broker Commissions

The System has no commission recapture, directed payment, or "soft dollar" arrangements; however, such arrangements may exist between brokers and investment managers. Broker selection is the responsibility of individual investment managers.

The following is a list of brokers who received \$10,000 or more in commissions during Fiscal Year 2019. Total

2019

Forty-Eighth Comprehensive Annual Financial Report

Presented by the DPERS Board of Trustees for the Fiscal Year Ended June 30

ACTUARIAL SECTION

CHEIRON 🧩

November 15, 2019

Board of Pension Trustees Delaware Public Employees' Retirement System McArdle Building 860 Silver Lake Blvd., Suite 1 Dover, DE 19904-2402

Dear Board Members:

At your request, we have prepared our annual actuarial valuations of each of the funded pension plans administered by the Board as of June 30, 2018. The results of these valuations are contained in the enclosed exhibits. Any distribution of the exhibits must be in their entirety, including this cover letter, unless prior written consent is obtained. The contributions actually made during FY 2019 were developed in the 2017 or 2018 actuarial valuations as noted in the provided exhibits. The basis for the GASB No. 67 net pension liabilities as of the June 30, 2019 reporting date are the 2018 actuarial valuations rolled forward to a June 30, 2019 measurement date.

Funding Objective

The funding objective of the System is to establish contribution rates that, over time, will remain level as a percentage of payroll for open plans and remain at level dollar amounts for closed plans. In order to achieve this, we developed contribution rates that will provide for current cost (i.e., normal cost expressed as a level percentage of payroll) plus a level percentage of payroll amortizations of the unfunded liability over specified periods for the open plans. For the closed plans, we have developed contributions expected to amortize the unfunded liability over the specified amortization periods. In addition, unfunded liabilities due to cost-of-living adjustments to retirees are funded through schedules of future transfers from the Post-Retirement Increase Fund.

To our knowledge, the State has consistently funded the full amounts required based on the actuarial valuations and specific statutory provisions.

Assumptions and Methods

The actuarial assumptions and methods used in the 2018 funding valuations were based on the most recent experience study completed during the fiscal year ended June 30, 2016. The Board set the investment return assumption based on advice from its investment consultant, which is 7.0% for the 2018 funding valuations.

We believe that all costs, liabilities, rates of interest, and other factors for the System have been determined on the basis of actuarial assumptions and methods that are individually reasonable (taking into account the experience of the System and reasonable expectations) and that, in combination, offer our best estimate of anticipated experience affecting the System. Nevertheless, the emerging costs rely on future plan experience conforming to the underlying assumptions and methods outlined in this report. To the extent that the actual experience of the Programs deviates from the underlying assumptions and methods, or there are any changes in plan provisions or applicable law, the results will vary accordingly.

Actuarial computations related to contributions presented in this report are for purposes of determining the recommended funding amounts for the System. Actuarial computations under GASB Statement No. 67 are for purposes of fulfilling financial accounting requirements. The computations prepared for these two purposes may differ. The calculations in the enclosed exhibits have been made on a basis consistent with our understanding of the System's funding requirements and goals and of GASB Statement No. 67. Determinations for purposes other than meeting these requirements may be significantly different from the results contained in this report. Accordingly, additional determinations may be needed for other purposes.

Board of Pension Trustees November 15, 2019 Page 2

This report was prepared for the Delaware Public Employees' Retirement System for the purposes described herein and for the use by the plan auditor in completing an audit related to the matters herein. Other users of this report are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any other user.

Reliance on Others

In performing our report, we relied on information, some oral and some written, supplied by the Delaware Public Employees' Retirement System. This information includes, but is not limited to, the plan provisions, membership data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

We performed a limited review of the data used directly in our analysis for reasonableness and consistency and have not found material defects in the data. If there are material defects in the data, it is possible that they would be uncovered by a detailed, systematic review and comparison of the data to search for data values that are questionable. Such a review was beyond the scope of our assignment.

Supporting Schedules

Cheiron is responsible for providing all figures in the following schedules of the Financial Section: Membership Data, Current Funded Status of the Plans, Plan Actuarial Methods, Schedule of Changes in Net Pension Liability, and Schedule of Employer Contributions. In addition, we were responsible for the information provided in the following schedules found in the Actuarial Section: Actuarial Assumptions and Methods, Schedule of Active Member Valuation Data, Solvency Test, and Analysis of Financial Experience for the State Employees' Pension Plan.

Certification

I believe the State's pension plans are adequately and appropriately financed, in that the contributions are determined and funded on a basis using reasonable actuarial methods and assumptions. I believe the actuarial computations under GASB 67 have been completed in accordance with that standard.

I hereby certify that this report and its contents are work products of Cheiron, Inc. These work products are complete and accurate and have been prepared in accordance with generally recognized and accepted actuarial principles and practices and our understanding of the Code of Professional Conduct and applicable Standard of Practice set out by the Actuarial Standards Board as well as applicable laws and regulations, including the use of assumptions and methods for funding purposes that comply with the Actuarial Standards of Practice. Furthermore, as a credentialed actuary, I meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys, and our firm does not provide any legal service or advice.

Sincerely, Cheiron

Elizabeth Wiley FSA, EA, FCA, MAAA Principal Consulting Actuary

Actuarial Assumptions and Methods

Asset Valuation Method

The market value of assets, representing the realizable value of the assets on a particular day, is not necessarily an appropriate value for the purpose of setting contribution rates. This is because funding will take place over a long period of time during which market values can be expected to fluctuate significantly from year to year. If market values were used to develop contribution rates, the resulting contribution rates would also fluctuate from year to year.

In order to produce a stable pattern of contribution rates, market values are adjusted to remove some of the volatility. The actuarial value of assets is equal to 1/5th of the market value plus 4/5th of the expected value, where the expected value is equal to last year's actuarial value and subsequent cash flows into and out of the fund accumulated with interest at the prior year valuation rate of 7.0 percent per annum.

Funding Method

We used the Individual Entry Age Normal Method to determine costs for all plans. Under an Entry Age method, a total contribution rate is determined which consists of two elements: the normal cost rate and the unfunded liability rate (UAL). In addition, the overall contribution rate includes a provision for the plan's expenses.

For each State plan, an Entry Age Normal cost rate is determined for each member of each respective plan. This rate represents the member's expected future employer-paid normal costs divided by his expected future salary, where both measurements are made as of the member's original entry date to the System.

In addition to contributions required to meet the normal cost, contributions are required to meet each plan's unfunded actuarial liability. Actuarial liability equals the present value of future benefits less the present value of future normal costs and future employee contributions. The unfunded liability is the total actuarial liability for all members less the actuarial value of the System's assets.

A portion of the unfunded liability will be paid through future, scheduled transfers from the Post-Retirement Increase Fund. These transfers will cover the liability increases due to the cost-of-living increases granted on January 1, 2015. The remaining unfunded actuarial liability will be amortized as specified in the supporting exhibits. We note that in the case where amortization is being performed over an open period, the unfunded liability amount is projected to decrease over time but not actually reach zero when all assumptions are met.

-CHEIRON 🎜

Board of Pension Trustees November 15, 2019 Page 4

Actuarial Assumptions

The actuarial assumptions for valuation purposes are based on the experience study completed in 2016. The investment return assumption has since been reduced after analysis and recommendation by the Board's Investment Committee. Please refer to the 2016 study for rationale in choosing the assumptions. Differences between assumed and actual experience (actuarial gains and losses) are part of the unfunded actuarial liabilities. The following significant assumptions were used in the actuarial valuations as of July 1, 2018:

- *Rate of return on investments:* 7.0% compounded annually (adopted 2017)
- Salary increases attributable to inflation:
 2.5% compounded annually (adopted 2016)
- 3. *Salary increases attributable to merit and productivity:* Increases for State Employees ranging from 0.0% to 9.0% per year (adopted 2014)
- 4. *Mortality:*

Rates of mortality vary by gender. For retirees, the assumption anticipates future improvements in mortality through the use of a fully generational projection scale (adopted 2016). Sample retiree mortality rates from the State Employees plan are as follows:

	Sample Rates in 2018	8
Age	Male	Female
50	0.43%	0.26%
55	0.61%	0.36%
60	0.83%	0.52%
65	1.17%	0.79%
70	1.82%	1.28%
75	2.96%	2.09%

Male: 110% of RP-2014 Total Dataset Male Healthy Annuitant Mortality Table adjusted back to 2006 with MP-2014 prior to application of a custom generational mortality improvement scale based on MP-2014.

Female: 100% of RP-2014 Total Dataset Female Healthy Annuitant Mortality Table adjusted back to 2006 with MP-2014 prior to application of a custom generational mortality improvement scale based on MP-2014.

- 5. *Rates of termination of service, disablement, and retirement:* Based on the results of the Experience Study completed in 2016 (adopted 2016).
- 6. Aggregate active member payroll: 2.50% annually (adopted 2016).

Summary of Plan Provisions and Changes in Plan Provisions

The plans valued are those described on pages 30-33 of the Financial Section.

Board of Trustees Delaware Public Employees' Retirement System Office of Pensions 860 Silver Lake Boulevard, Suite 1 Dover, DE 19904

Dear Board Members:

Gabriel, Roeder, Smith & Company (GRS) is pleased to present this report of an Audit of the June 30, 2018 Actuarial Valuations of the Delaware Public Employees' Retirement System (DPERS). We are grateful to DPERS Staff for their cooperation throughout the Audit process. In addition, we wish to thank Elizabeth Wiley and Fiona Liston of Cheiron for their assistance with this project.

The Actuarial Audit has several related objectives:

- Verify the demographic data through independent collection and processing,
- Review the appropriateness of the actuarial assumptions,
- Review the 2018 Annual Valuation Reports,
- Replicate the results of the June 30, 2018 actuarial valuations, including a review of individual test life calculations, and
- Express an actuarial opinion regarding the reasonableness and/or accuracy of valuation results.

In our opinion, the retained actuary's work provides a fair and reasonable assessment of the financial position of DPERS. We are pleased to report that we have found no substantial errors or omissions in the retained actuary's work.

Throughout this report, the reader will note items where GRS sees things differently than the retained actuary. Indeed, our mission is to point out such items. In interpreting our comments, Trustees should be aware that while we are pointing out sources of difference, we are in agreement with Cheiron on the vast majority of items reviewed.

Respectfully submitted,

Bonito J. Wurst

Delaware Public Employees' Retirement System

— A component unit of the State of Delaware

Forty-Eighth Comprehensive Annual Financial Report

Presented by the DPERS Board of Trustees for the Fiscal Year Ended June 30

STATISTICAL SECTION

2019

About the Statistical Section

This section provides the reader with detailed information about the economic and demographic trends experienced over the past ten years in the System:

Schedule of Principal Participating Employers lists the entities that make up at least 50% of the System's two multiple-employer plans (County Municipal Police & Firefighter and County & Municipal Other Employees').

Schedules of Additions by Source and Deductions by Type display for each plan/fund the changes in plan/fund net assets as a result of payments made to and by the System.

Schedule of Benefit Deductions by Type identifies the type of payments made to beneficiaries and to former employees.

Schedule of Retired Members by Type of Benefit by Plan identifies the range of benefit payments made to retirees sorted by plan and type of retirement for the current fiscal year.

Schedule of Average Benefit Payments by Plan presents the average monthly benefit paid as of June 30, 2018, for plans that calculate benefits based on years of service or salary.

Schedule of Participating Employers lists all the current participating entities in the plans and funds within the System.
